### The State Conventions.

Fall reports of the proceedings of the Lecomptor anti-Lecompton and Republican State Conventions, wil he published in an extra sheet this morning. Single copies twenty-five cents. Newsmen supplied at ten dollars per hundred. Sacramento, August 7th, 1858.

NEWS OF THE MORNING.

The Golden Gate arrived in San Francisco yesterday forenoon, bringing dates from New York and New Orleans to July 21st. The intelligence was at once telegraphed to the UNION, and published by us in an Extra, and will be found on our first page. The principal event of interest recorded in the news is the failure in laying down the telegraphic cable across the Atlantic. It is stated that another attempt will be made this season, but we think this somewhat problematical. Our relations with Mexico have been suspended with the consent of our Government. Douglas remains still the champion of Popular Sovereignty, and is carrying on a triangular war with the Administration on the one hand, and the Republicans on the other. It will be seen that, in opposition to what the friends of Lecompton in this State represent, he is still attacking the English Compromise Bill, and is making vigorous speeches against the Administration. This fact will upset some of the late arguments and appeals of the Lecompton leaders in this State. The political campaign in the East has commenced with much activity. A distressing accident had taken place on the New York and Erie Railroad, by which six persons were killed, and about forty wounded. General Quitman, a well known officer in the Mexican war, and for a long time a member of Congress, died recently at his residence near Natchez Mississippi. William Walker was trying to get up a fillibuster movement in Alabama, and meeting with considerable success. A severe storm had occurred in Albany, and heavy rains at the South. Troops had been ordered to Oregon. The foreign news is not important. Its principal feature, per-

haps, is the passage in the House of Lords of the bill for the admission of Jews into Parliament. H. M. Gill, convicted of manslaughter in Sacra mento county, has been restored, by the Governor, to citizenship, having served out his term of im prisonment. Wallace Kennedy has also been restored to citizenship. He was sentenced to nine months imprisonment, which term expired May, 1857. The commitment does not state the crime. The lawsuit at the State Prison was not concluded when the Governor and Secretary of State left on Friday.

San Francisco News-Anti-Lecompton Success-Important Commercial Case Arrest for Robbery.

SAN FRANCISCO, Aug. 15. The Democratic Primary election, yesterday, reulted in the choice of 43 anti-Lecompton, and 17 ecompton delegates to the County Convention and 43 anti's to 14 to the Legislative Convention. There was little contest and scarcely any office, holders to be seen.

In the U.S. Circuit Court, yesterday, where suit was brought to recover possession of a large quantity of coffee from a person to whom it had been pawned for \$3,900, by the absconding broker, Edward Hielbuth, Judge McAllister charged the jury that a broker has no right to pawn or raise money on the goods of his principal. This is contrary to various decisions of our State Supreme Court,

which fact the Judge mentioned, and said that while he paid the utmost deference to that tribunal in all cases involving principles of a local character, his instructions from the Supreme Court of the United States were that in cases of a commer cial nature, involving principles of importance al over the Union, he must regard only the general current of legal authorities. The jury acted ac ordingly and gave a verdict for the plaintiff. The ase is one of great importance to merchants. Robert Logan arrived from Victoria on the last steamer en route for his old mining claim, up

ountry, and brought with him a Victoria acquain ance, named William Wilson, who, last night, robbed him of \$140 and a breast pin, and was placed in durance for it this P. M.

STREET LABELS .- A correspondent, speaking of the improvements in this city, which are not excelled, considering the term of its existence. by those of any city in the Union, remarks as follows:

In its rapid strides of progression, one item treet labels, have been overlooked. The omissic has been an evil hourly experienced by citizen and strangers, and needs the application of remedy without delay. For the early accomplish ment of an object so desirable, the following cheaj ment of an object so desirable, the following cheap and expeditious method is suggested, as it will not cause delay nor increase the financial embarrass-ments of the city. Let the municipal authorities and School Commissioners mutually appoint a committee, to select from the Common Schools a dozen or twenty lads. After a few appropriate lessons under their instructors on the black board, they will be qualified to go forth, with chalk or charcoal in hand, and place appropriate numerals charcoal in hand, and place appropriate numeral and letters of the alphabet on the buildings and fences at the corners of the streets, and an impor-tant chieved will be accomplicated. Let us tant object will be accomplished. Lads thus ap pointed would, during their lives, look back will pride and pleasure on their first official act.

THE BENSLEY WATER IN THE CITY, AND FIRE HY DRANTS LOCATED.—We noticed, a week or so ago the fact that the Bensley Water Works Company had succeeded in bringing into the city, as far a North Point, a beautiful and abundant stream o water from Lobos creek. The level of the flum at North Point is a few feet below the level of Bat ery street, and it is now proposed to lay pipe long Battery and First streets, as far as Folsom with hydrants at every street intersection. The Special Committee of the Board of Supervisors, in company with the Chief Engineer, this morning went over the ground, and selected the sites for the hydrants. There have been procured from New York twenty-two, and these will be located between Union and Folsom streets; one at every street intersection, with the exception of Mission street rowsing, which neeves two, being a very combustible neighborhood. The streets named will be immediately dug up—the work having in fact already commenced—and the pipes, which are cast iron, of ten, inches caliber, will be laid down next week. The hydrants will be attached and ready for use. A cellar has been hired at the extreme north end of Sansome street, and is now being cleared for the purpose of making a reser-voir, in which the water will gain a head before passing into the pipes. The head of water will be high enough for distribution over all the lower part of the city below Montgomery stretet and in every part of Happy Valley. This arrangement is merely temporary, until the reservoir on Rus-sian Hill can be constructed and in working order, which will doubtless be a number S. F. Bulletin, August 14th

JUSTICES OF THE PEACE .- At the election which is rapidly approaching, the people of this city will be called upon to vote for three Justices of the Peace. Under the Consolidation Bill, they are required to act alternately as City Recorder. It is thus seen that the office is one of real importance to the people, and that none but competent and reliable men ought to be elected to fill them. They should be elected, too, without any particular regard to politics. Their peculiar fitness for the position should alone be looked to, and if the right kind of men are not on the tickets nominated, they ought to be scratched and better men substituted. Justices and Supervisors may well be placed in a class as officers, for which alone those best fitted to discharge their duties should be voted for. Let the people look to these things.

THE LIME POINT LAND .- A motion was made great enterprises which Americans and Englishin the Seventh District Court for Marin county, men will never abandon. Judge McKinstry that the Government at Washington takes a dedismissed the application, says the Herald, in cided stand in favor of opening the Nicaragua consequence of insufficient notice to plaintiff, and gave defendants until September 2d to prepare a statement to be used on a similar motion.

A MINING CASE. In the case of Parsons & Whitesall vs. Moore & Ridgway, tried by the Court, says the Stockton Republican, a decision was rendered for the defendants. The plaintiffs had deposited gold dust to the amount of \$1,015 with one D. K. Swain, at Cave City. Swain was employed by defendants to purchase gold dust for them, they furnishing him with coin to do so. Swain also purchased dust for other parties. The opinion of the Court was that this fact did not make defendants responsible in this case.

MEXICO .- So great was the distraction that the President had approved the suspension of Ge diplomatic intercourse with the ruling Government, and had directed the legation to return to the United States. The national Government of Mexico appeared to be on the point of dissolution.

SAN FRANCISCO INSOLVENT CASES .- On the 14th of August, the Sheriff was appointed assignee of Benjamin T. Chase, Samuel E. Metcalf and S. P. Whitman, applicants in insolvency. In the Fourth District Court, the Sheriff was appointed assignee of Isaac Silverstine.

AMERICANS .- We hear that there is some talk of making an effort to revive the American party in this county. Whether it will result in action, we are not advised. If the members had moved earlier, we suppose they might have polled a pretty strong vote in the county.

THE ALLISON LEAD .- It is stated in the Nevada National that the proprietors of this celebrated lead from every twenty-four hours crushing, realize from one hundred and fifty to two hundred ounces of gold,

FRASER .- It appears that the Fraser discovery created an excitement at one point in the Union liquors in bottles and draught, and best work of sale of this establishment to E. R. Budd and S. sluices robbed on the night of August 12th of besides California, and that was in Minnesota.

previous to the arrival of the steamer, was that which would herald the failure or success of the Atlantic Telegraph, and a serious disappointment will be felt by the public upon learning that the grand enterprise has met with a second failure. Full particulars have not yet been received, but enough has been transmitted to show that the wonderful undertaking has been abandoned, at least for this season, if not finally, by the present Company. Their hopes, as well as millions of their money, sunk with that portion of the Telegraph cable which went down to the bottom of the Atlantic, midway between Europe and America. It may be years first, it may be under different auspices, and under the administration of the same or different men; but the grand idea of uniting Europe and America by a telegraphic cable will finally be realized. Other failures may follow, but success, we are confident, will finally be achieved, in spite of winds and waves. It is one of those

It is an item of interest on this side to learn route, and that it is likely to be in operation within the succeeding two months. We are also glad to learn, in California, that a complement of men, with an abundance of material for preparing the Tehuantepec route for the transportation of the mails and passengers, had sailed from New York for the Isthmus. With the Nicaragua and Tehuantepec routes both in operation, some three mail lines overland in running order, and the means of communication to and from California will be increased almost bevond calculation.

several points. Among the speakers were Anderson, Stratton, late of the Assembly, and Lynch. At Auburn, August 7th, the following resolution was passed :

Resolution was passed. Resolution was passed. Inited States we recognize the only political party now in existence which in times past has been faithful to the compromises of the Caciltution, to the Union, and to the rights of the citizen, whether native or naturalized, and that in the present crisis we will give to the nominees of the party-State and county-our united and zealous support.

organ declares that the UNION has always been in a minority, anti-conservative, and that its polthe greatest interest was felt by the people, itics have ever been execrable. Another changes the tune, and asserts, like the Mountain Democrat, that the UNION has been conservative, but has abandoned its principles, and deserted its (Administration) friends for hope of reward. The charge under notice is that delegates from the Douglas and Republican wing "had an interview with the proprietors of the UNION, and the leading Broderickites and Republicans pledged themselves to give the nomination of State Printer to one of the proprietors of the UNION, and in return the UNION agreed to support the Broderick-Republicans, and devote it. self to the defeat of the Democratic party." Now, it is hardly necessary to say to those who are acquainted with the general course of this paper, and especially on the question of popular sovereignty, for years, that such a charge is without basis in fact, for no change in our principles was necessary. The whole story is false, and the editor of the Democrat knows it better than any one else, having manufactured it out of whole cloth. It seems to be impossible for such partisan papers as the Mountain Democrat to conceive the possibility of a journal being actuated by principle in its notice of men and measures. Judging from their own experience, they imagine that every other paper must receive a bonus for advocating this or that public measure, never once dreaming that an independent sheet finds it both pleasant and profitable to speak freely of public men and affairs, and denouncing political iniquity in high places as well as low. The Democrat is indeed a fit medium to issue such charges; a paper which advocated with great fierceness the anti-Lecompton cause, until a missive reached it from the Custom House, commanding it to retrace its steps. If the UNION had advocated the Lecompton iniquity, does any one doubt that its course would have been approved and its arguments hailed with most fraternal commendation? We say to these small writers, one and all, that the opinions of the UNION are not a purchasae article. There is not money enough in all e political parties of the State, with the Cusm House and Mint, and the State and National dministrations thrown into the scale, to buy eem; and among decent papers, of which lowing accidents, one of them fatal, are recorded e do not consider the Mountain Democrat a epresentative, the fact is very well known. We believe the acts of the Administration, in regard to Kansas, were intended for the best, but that does not make them right—it is an old but that does not make them right—it is an old Presbyterian maxim that "h-l is pared with good intentions." No legislature has the right to usurp the dearest privileges of the citizens. Two years ago we voted to amend the Constitution of this State so that it could never be changed by the Legislature, or any other body, without first sub-mitting the question to the people. We believe it is already on record—or if not, as an interesting item of information we will place it there—that the first importation was in 1855, by a Mr. Shelton, who succeeded in bringing two living hives across the Isthmus. He started from the East with a large number, but all perished except the two mentioned. He settled in Santa Clara county, and probably would have been quite suc-cessful in his enterprise had he not unfortunately been killed a few months after, by the blowing up of the steamer Jenny Lind. The bees, we think, subsequently passed into the hands of Mr. Ken-nedy, of Santa Clara; or, at any rate, they were the "first families" of the honey bee tribe to Cali-fornia. We believe it is already on record-or if not, as fornia.
