SACRAMENTO DAILY UNION.

THURSDAY, JULY 14, 1859.

NEWS OF THE MORNING.

On the arrival of the Overland Mail yesterday at Gilroy, we published an Extra containing most important news from Italy, which will be found elsewhere, and to which we have referred in another place. The domestic intelligence is not of great importance. The dates from St. Louis are to be that the substantial fruits of victory reto June 20th.

The brief remarks which Senator Broderick made at Forest Hill on Tuesday evening, while suffering under indisposition, will be found on our first page. They are fully as characteristic as those recently delivered by him at Placerville. The speech of John Conness, candidate for Lieutenant Governor on the Anti-Lecompton ticket, at Georgetown, on Monday, will also be found on the same page. It is direct and straight forward. Broderick and McKibbin speak at Marysville to-night with A. H. Myers.

J. B. Weller and C. L. Scott hold forth at Cedarville, in El Dorado county, to-night.

S. A. Booker will commence his speaking about July 20th, in Mariposa.

The Lecompton State Central Committee will meet at San Francisco on Thursday, the 21st forty leagues from Vienna, one hundred and day of July.

Later intelligence than that contained in our Extra of yesterday will be found in our tele. this time 189,000. It is spoken of in modern graphic columns, forwarded by our St. Louis works as one of the richest, most splendid and correspondent, by telegraph to Tipton, Mo. The Golden Age has now been out twenty-four days and may soon be expected. If it connects

with Tehuantepec, it will bring seven days' later news. The Supreme Court has delivered another

decision. Knowles vs. Joost was action to enforce a lien on a building for materials furnished the contractor, and used in the construction of the building. The finding of the referee, which, its interior and exterior appointments produce as the evidence is conflicting, is conclusive as to the facts, says the Court, shows that before notice of the lien was filed, or notice given to the owner of the building, he had fully paid to the contractor all that was due him upon the contract. The statute furnishes to material men and sub-contractors cheap, easy and expeditious means of attaching in the hands of the builder any money due from him to the contractor, but does not prevent him from agreeing to pay for the work as soon as it is completed, o from complying with such agreement when made. Whether a different rule was established by the Act of 1858 it is not necessary to inquire, as the construction of that Act was not involved in this case. Judgment affirmed.

EL DORADO .- The Observer, of July 13th,

chronicles the following items :

On Sunday last about a dozen fine mule teams, with substantial road wagons, arrived here from with substantial road wagons, arrived here from Salt Lake City. These teams are the property of Chrisman, of Salt Lake, and came through for the express purpose of obtaining freight at Sac-rameuto. This train made the trip through from the Mormon city in about thirty days. This, with heavy wagons, is very fair time, but the stock does not appear in the least jaded or other-wise injured by the trip. The train did not halt in the city, but taking the road to the lower in the city, but taking the road to the lower crossing of Weber Creek, immediately rolled on

Waldron has shown us a specimen of the gold quartz which he obtained at the diggings. It is quartz which he obtained at the diggings. It is a sort of iron colored formation, and contains a large per centage of the precious mineral. He also confirms the reports which we have received in relation to the richness of the Gold Cañon dis-covery, and says that the diggings are unques-tionably the richest ever known on the conti-pant

On Monday last Mr. Gillmore started out to hunt for some stock, which had strayed from his premises on the Cosumes. He stopped at a cabin in Long Hollow formerly occupied by an Englishman named Hezekiah Cosford, and his surprise may be imagined upon finding the poor man lying dead and alone. Coroner Dougherty was sent for, and, assisted by Dr. Rankin, of this city, held an inquest upon the body. The ver-dict of the jary was that deceased was a native of England, aged 43 years; that he came to Cali-fornia in 1851, and died from disease of the

will have the tendency not only to restrain the naturalization of foreigners, but to check the emigration to this country. It seems rather strange to revive such an important question when we foreigners thought it was settled a long time ago, the Kotsza affair being a case in point. But now it appears by Lewis Cass' letter that a Frenchman (the letter having reference to Frenchmen), having complied with the naturalization laws of this country, has no right to ask protection from the American flag outside of the imits of the United States. What does this mean? It is inconsistent with the naturaliza tion laws enacted by Congress; inconsistent with the oath that he takes in becoming such citizen, perjuring such oath against his will. What is the qualification for such foreigner to become a citizen of the United States, to possess

and enjoy the same rights and privileges of a native born American? He must declare on oath to support the Constitution of the United States; that he doth absolutely and entirely renounce al allegiance and fidelity to every foreign prince potentate, State or sovereignty whatever; and particularly, by name, the prince, potentate, Stat or sovereignty whereof he was before a citizen o ubject. The struggles and groans of the strangling Mexican aroused the dog and set him to barking most furiously. On the evening that the train to which Sill and

Hathaway belong arrived at the sink of the Humboldt, they found the dead body of McDougald, who had just been murdered and stripped of everything except a check shirt. A number of Pinte Indians were at the sink, and also two white men, named Anderson and Bennett. Upon being interrogated, Anderson very promptly stated that he had shot McDougald himself, and gave as a reason that Mac was a notorious old horse thief and robber. Our informants further state that upon their

arrival at Ragtown they learned that Bennett and Anderson had given a new version of the affair at the Sink, by saving that the emigrants had held an inquest over the body of deceased, and found that he had been killed by the Indians. This is about the substance of the affair, as related to us by the two young men who arrived here on Monday. As McDougald is known to have been in possession of several hundred dol-lars worth of goods, there can be but little doubt that he was deliberately murdered and robbed.

HARD QUESTIONS .- We commend the following to the attention of those who approve of Gen. Cass' late letter on the doctrine of protection :

SAN FRANCISCO, July 8, 1859. EDITORS ALTA: I have read with great interest in your issue of to day an article entitled "Our National Rights as a Neutral Power," in which you speak about the letter of Hon. Lewis Cass to Mr. Le Clerc, by which I see that a Frenchman who naturalizes himself in the United States loses his right of American citizenship if he goes back to France. back to France.

Now, I wish you would tell me if my case is the same at all. By answering the following ques-tions you would oblige a great many who are in the same position. I was born in France; came to the United States at the age of 17; at 21 I took out my papers as an American citizen ; my intention was, and is, to remain under the United States banner, but as lintend to go to France to pay a last visit to my aged parents, I wish to know if the American paper will entry wish to

have if the American papers will protect me, or shall I have to take a French passport? In the latter case, of what use is it to me to be an American citizen if I have to visit my native country, and what am I to do with my American papers? Shall I keep them to the to the papers? Shall I keep them to show to my grand-children, if I am to have any, or of what use would they be to me outside of the United States? Very respectfully yours, P. Puyyou, 157 Kearny street.

A COUNTY CLERK IN SOAK .- Judge Ogier, County Clerk Duer, Balie Peyton and others from San Francisco, recently visited Yo Semite Valley. On their return to Mariposa the following incident took place, as related by the Mariposa Gazette :

Judge Duer, on arriving, proceeded to take a bath. The Judge turned on the water and forgot to put in the plug of the tub. However, as the to put in the ping of the tab. However, as the water came in faster than it could get out, the tub gradually filled, in which the honorable gen-tleman proceeded to soak his corporosity. Un-fortunately, he went to sleep, and after a lapse of three hours was discovered—his head just out of the tub full of water, and emitting sounds from his nose like unto that of the sawing of boards. The firder of him halloed, "Are you will apply to every emigrant of ordinary vigor dead

"Ugh," was the response. "When are you coming out of that?" "None of your d----d business," to which was added. "When I'm clean."

As nearly a thousand gallons of water had done something towards cleaning him, he concluded, after getting his eyes open, and mature deliberation, to get up.

REGATTA .- It is anticipated that our waters will be enlivened with a regatta sometime during the coming State Fair-the contestants to be sail-boats of California manufacture. nent that bids fair to be of great utility has just been perfected by two California artists, Samuel G. Sheldon and James R. Johnson. t is a self-acting paddle or bucket for steam boat wheels, and sppears to embrace many advantages over the paddle now in use. The bucket is constructed with three wings, giving

it a triangular form, and is hung upon journals, so as to permit it to revolve. It is believed

that there will be no perceptible jar to the boat on its entering or leaving the water, and calculations have been made that by the use of the improvement there will be a saving of 20 per cent. of fuel, and that with the same num ber of revolutions the boat will accelerate its speed at least two miles an hour. The bucket is so constructed that as it touches the water two wings will oppose the pressure, whilst the third acts the part of a rudder, and keeps it in its proper position. On leaving the water the bucket revolves and is left comparatively dry. Buckets made after this plan can be attached to any wheel now in use with but and wrought iron-a bar of iron extends from one arm of the wheel to the other, and passes

Of course we never do wrong. But just let as suppose that some of our Indian disturbances may have originated thus. Just let us imagine hat a Digger has the same nice principles of onor that a member of Congress has, or a ury declares that he should possess. Let us consider that they have the right to defend the chastity of wife or daughter; that they may demand "an eye for an eye and a tooth for a tooth," or even life for life. Why, then, in the name of justice, teach them that civilization carries with it something stronger than simple lust and might.

NEVADA .- We notice the following in the Democrat, of July 13th :

Suit was commenced in the District Court. on Monday last, by Appleton Plumley and his wife, Eliza Plumley, against George Sutherland, for slander, claiming damages in the sum of \$2,000. It is alleged in the complaint that th defendant has stated that Mrs. Plumley entered his house and purloined therefrom sundry books and accounts belonging to defendant.

An old man, named Clayton Tweed, formerly from Chester county, Pa., was killed on Mon day evening at Gopher Hill, about six miles from Nevada, by the caving of a bank. He and another man, named McGrew, were at work in the claims of Oatman. They saw the little expense. They are constructed of wood bank of earth coming, and jumped to get out of the way, but without success. Tweed was completely buried and instantly killed, and through the journal at each end.
