FRIDAY EVENING, DEC. 7, 1850.

The Geographical Society of the western states has recently adopted a resolution to establish a system of regular lines of steamer for the transportation of mail and passengers between the various points of the United States. The line of steamer is to be 200 miles long, and the passengers are to be carried at a price of $5 per day. The system is to be operated by the government, and will be in operation by the first of next year.
