## SACRAMENTO DAILY UNION THURSDAY MORNING, AUGUST 9.

### FOR STATE PRINTER, PAUL MORRILL. One of the Proprietors of the Sacramento Union.

### The Convention.

It will be seen by our report that the Con vention concluded yesterday some of its most important business - candidates for Governor, Lieut. Governor, and two Judges of the Supreme Court. Col. Johnson will make a strong run for Governor, and the gentlemen nominated so far, may consider the remark of the President in regard to the ticket nominated, a prophesy to be literally fulfilled. The people will confirm those nominations. We shall extend our remarks upon the ticket hereafter.

### The Late Murders in Amador County.

LYNCHING OF THREE MEXICANS - ARREST OF OTHERS, &c., &c.-We are indebted to Mr. J. S. Graham, agent of the opposition line of stages, for the following later news relative to the late slaughter by Mexicans of American citizens near Drytown. It appears that after the band of Mexican desperadoes had committed the murders heretofore detailed at Raucheria, they went to the Mokelumne river, where they killed four Frenchmen. But their bloody career was shortly afterwards checked by the pursuing avengers' who overtook and captured three of the party, and immediately brought them into Sutter, where they were instantly hung. One of those who had been active in their arrest, unfortunately met with a fatal accident, in endeavoring to dislodge his gun from one of the mules that he had driven in. The piece having caught in the trappings, exploded, killing the man at once. His name has not transpired. At the time of the departure yesterday of the stage two more Mexicans together with a white man had been arrested and were undergoing a trial in Sutter. It was supposed that they would suffer a similar fate with their compeers in crime.

"A SCREW LOOSE."-There is trouble in the Phalanx Camp, as the blank look of their ticket in yesterday's Journal affords indisputable evidence. The would-be Senator Long's name is withdrawn, as are also those of all the accomplished aspirants for assembly honors, except R. D. Ferguson-he is still going.

Our Hessian cotempoary is perfectly mum as regards the causes which have induced their legislative champions to retire from the canvass. The simple publication of the card convening the county committee to fill the vacancies, constitutes the sum total of our information relative to the matter. This act of withdrawal, however, must lead one to the irresistible conclusion that the nominees, thoroughly impressed with the belief that they could not receive a majority of the suffrages of their fellow citizens, have very quietly abandoned the sinking ship. They have also sensibly withdrawn before opposing nominations were made, so as not to incur the odium attached to the timid politician. Oh ! these Know Nothings! They bewilder, distract and divide their Phalanx foes, and then overwhelm them with defeat. So mote it be.

A RICH CLUSTER .- A small stem, of the size of a lady's riding whip, but bearing twelve large ripe red free-stone peaches, was presented to us yesterday, by Thomas O. Selby, on whose highly cultivated gardens on the southern outskirts of the city the tree from which the sprig was cut was grown. The astounding fecundity of this fruit tree we be lieve to be unparalleled, for there are at present on its branches no fewer than one thousand peaches, of which the cluster above mentioned are but fair average samples. The alluvial soil of the Selby gardens being low, has until recently been annually overflowed, and in richness is unsurpassed by any other portion of the agricultural lands of the val-

HOME PEACHES .- Our pomological friends appear to be vieing with one another in their praiseworthy exertions to exhibit the finest and rarest specimens of the delicious fruits of the season. On yesterday,

The nominations were then declared closed. Before proceeding to vote, Mr. Farley, of Amador, moved by resolution that it be by ballot; to which Mr. Mathewson, of San Francisco, offered as an amendment, that the vote be taken *vicu* roce.

Mr. Gatewood thought the vica coce vote calcu-ated to influence the votes which followed. Mr. Churchman thought the ballot the best mode, it care according to the ballot the best mode, lated as it gave every man a chance to vote his unbiassed preference. He argued that the *vica voce* mode was calculated to influence the result, as those who followed did not always like to vote contrary to those

lowed did not always like to vote contrary to those who preceded them. Mr. Wnitman replied, and declared that as he was rather a fat man and growing fatter every day, he was very desirous to adopt the most expeditious mode of voting, for he very much feared, if he re-mained in this hot climate until the nominations were made by ballot, that there would only be a grease spot of him left to be presented to his con-stituents. He also wanted the chance to vote open-ly for the men he wanted, and did not believe there was an American present who would shrink from an open vote.

He did not recollect ever to have heard the same views before present-ed. By ballot left every man to vote his own choice unmolested, destroyed the heavy influence exerted by the large counties under the view coce mode, and reduced the chances for swapping and trading between the friends of different candidates. He should vote for the ballot system. The previous question was called, and sustained. Under its operation the viva voce amendment was lost, and the resolution to vote by ballot carried. The delegates to the Settlers' and Miners' State Convention assembled at two o'clock, p. N. yeserday, in the Methodist Church South, on Seventh street, and organized temporarily by calling I. W. Underwood, of Sacramento, to the chair, and the appointment of C. R. Saunders, of San Francisco,

as Secretary. The chairman briefly stated the object of the Convention, whereupon, on motion of W. H. Gra-ham, of San Francisco, a committee of five, con-sisting of D. F. Douglass, of San Joaquin, G. FIRE.—Last night the dwelling house, stables and out-buildings on Herrick's milk ranch, situated in the western suburbs, on the line of Clay street, were entirely destroyed by fire. Thirty-seven head of cattle and six horses were consumed in the flames. The fire broke out about 113/ o'clock, and an alarm was given from the Fourth Ward. There was no water to be had in the vicinity of the fire, and the firemen returned with their engines, after proceeding some distance beyond the Pacific Toll Gate.—Herald.

FURTHER FROM AUSTRALIA.—It was reported at Melbourne, on the afternoon of the 9th May, that a party of miners at Tarrengower had come upon a boulder of gold of the astonishing weight of ten tons. Upon making inquiries we found that this rumor was generally prevalent, although there was some discremence with respect to the locality is some discrepancy with respect to the locality in which this wonderful "find" occurred. At the Treasury a report of the kind had been circulated, with a statement that the Government Commis-

Treasury a report of the kind had been circulated, with a statement that the Government Commis-sioner had left for Melbourne. The official, how-ever, does not appear to have reported himself, and at present everything in respect to the discovery is extremely vague and uncertain. Without vouch-ing for the correctness, not only in details, but the statement in chief, we give what particulars have reached us. A quartz crushing party at Tarren-gower, on Monday, came upon a block of aurifer-ous quartz, it is said, in which the precious metal predominated to such an extent that ten tons were valued at three-quarters of a million sterling. In a subsequent issue the Argue says : The rumor of an extraordinary discovery of cold

In a subsequent issue the Argue says: The rumor of an extraordinary discovery of gold at Tarrengower remains uncontradicted, although very little has transpired to corroborate the report. We were informed yesterday, by a respectable tradesman of Melbourne, who has extensive quartz crushing machinery at Tarrengower, that a miner who had just arrived from Kyneton, told him that rumors of a large gold find were in general circu-lation in that township, and that people were flock-ing to the diggings in crowds.

troops. She afterwards proceeded to Oregon. MINING AT GOLD BEACH. - A steam pump, of suf-

ficient power to furnish from 25 to 30 tom heads of water, is about to be erected at the mouth of Rogue river. On the southern side of that river a com-pany has been cutting a ditch from a creek some four miles distant, which in the summer season will furnish about eight, and in the winter time probably as much as twenty-five tom heads of wa-ter. The beach diggings for several miles pay from three to eight dollars per day, to such as have plen-ty of water. There are at present but some seven-ty persons actually engaged in mining, but a rush is anticipated by the time when the arrangements for supplying water shall have been completed.

Alphonse de Grandier. Pauline proceeded to address the multitude, for two hours, in an exceedingly appropriate, forcible and elo-quent speech. The career of the Bigler dynasty, the evils of the National Administration, the causes of the origin of the American party, its principles and policy, and the results sought to be achieved by the organization, were severally, ably and fully dilated upon. The remarks of the Honorable gen-tleman, although necessarily desultory in their character, were exactly suited to the occasion, and there was a marked appositeness in every truth ut-tered, analogy drawn, witticism perpetrated or de-formity exposed, which held the immense gathering spell-bound, as it were, until the final word fell from his lips. Kewen made an onslaught on the citadel of Phal-anxism which it will never recover from until the now tottering fabric is mingled with the dust. At the close of the eloquent speaker's remarks, loud calls were made for "Governor Johnson!" A motion that no proxies be allowed in the Con-vention was ruled out of order. The call of the counties was then proceeded with. A motion to admit the regular delegate and ex-clude a proxy from Alameda county, gave rise to a spicy discussion between Sargent, of Nevada, and Brosenan, of San Francisco, the former in opposi-tion and the latter in advocacy of the motion. The question having been sprung as to who should be permitted to vote, it was decided to call the roll of delegates, and permit those to vote who were present as principals.

On motion of Mr. Douglass, the report of the Committee was then unanimously adopted with the exception of the Sierra delegation, whose cre-dentials were referred back to the Committee, with instances to express the report of the

instructions to report thereon this morning. Sundry motions having been in that direction, the Convention finally adjourned, to meet at Con-cert Hall, on K street, at 9 o'clock this morning.

MONUMENT TO O'CONNELL .- A numerously-atended meeting was held at Limerick, for the purpose of crecting a statue to the late Mr. O'Con-nell, in that city. A letter was read from Mr. Hogan, the sculptor, in which he proposed to ex-ecute a statue, eight feet high, in Portland or Caen stone, for the sum of \$3,000. The subscrip-tion to be received will govern the committee in the character of the proposed statue.

THE THEATER .- Buckstone's comedy of "Rural Felicity, and a new charming comedietta are designated on the bills as the attractions at the Theater

for this evening. It is not the slightest exaggra-tion to assert that the company now performing in this city far surpass in talent and accomplishments any theatrical corps which has ever before favored our citizens with their presence. THE NEW HOSPITAL. - The Hospital question and a majority of the committee reported that the building on Greenwich street could be put in a comdition to receive patients at an expense of some \$600 or \$500, but that it was necessary, as proposed by the late Board, to procure new furniture, as that in use at the building in Stockton street was unfit or service.

IMPORTANT FROM ACAPULCO. - The Gold Mine

Hamburg-Execution by Americans of a Rascally Guide-Terrible Murders of Alvarez.-You will re-member that some time since, when wild reports of the wealth of the Guerrero gold mines were in cir-culation, I warned you that the whole humbug was probably an invention of Alvarez and Denman, the American Consul, to attract adventurers, who, when they should find no gold, would be compelled to enter the service of Alvarez. By nove residued when they should hind no gold, would be compelled to enter the service of Alvarez. By news received yesterday from Acapulco, by letter and by conver-sation of persons from that place, my supposition, as stated to you, is confirmed. Alvarez and his party were expecting to obtain from San Francisco 1,000 men, who would be very valuable in an at-tack on Santa Anna's forces; for the native troops of Alvarez are worthless, except when acting in the defensive on their own land.

defensive on their own land. Instead of 1,000 men, only six had arrived, who were assured, most solemnly, by Consul Denman, that the reports of the richness of the gold mines were true. They placed faith in his word, pur-chased an outfit of provisions, tools, and so forth, and started for the mines, with John Moore, a Por-tuguese, who pretended to have been in the mines, as a cride.

Finally, they arrived at the pretend-ed mines, and it was soon evident that there was no gold and no mining there. Thereupon the Americans held a lynch court, and ended the mat-

Americans held a lynch court, and ended the mat-ter by hanging Moore. Alvarez, on hearing of the affair, sent out soldiers to arrest the Americans, but the latter were not to be found. The report published here first, in the *Town Talk*, of the executions, is correct. Forty-two offi-cers, who had served under Santa Anna, were shot, because they refused to serve Alvarez. Soon after-wards, six prisoners weretaken from jail, compelled to dig their own graves, and then cut down with hatchets (machetes.) The motive of these murders, appears to have been fear; for a report had reach-ed Acapulco, though it was known only to the offi-cers, that Comonfort had been defeated, and was upon the retreat. Alvarez is in great want of

The next day, it having been ascertained that they were of the tribe engaged in the murders, they were a hanged by the people. One of them, bewere hanged by the people. One of them, be-fore the rope was placed around his neck, stated that they had come into town for the purpose of getting ammunition from some negroes who had

for some time been supplying them. He also stated that he had killed several white men. The same day six Indians were shot on Humbug. Since writing the above, we have learned that the Scott Valley Indians have given up their

guns, and are now upon the government reserve at Fort Jones. Five Indians were killed at Hamburgh Bar on Thursday evening. The Rogue river Indians are all quiet, with the exception of three or four.

The Doctor's thorough knowledge of the principles of Physiology and Pathology, and the modus operandi of the agents enbraced in our Materia Medica, is a guar-antee of the assurance that all will be treated in accor-dance with the established principles of Medical Science, and in accordance with the improvements made therein. A lady of high standing in society, and great respecta-bility, published a card in the Philadelphila Sunday Dis-patch, Sept 14, 1501, which is as follows: A CARD.—The undersigned feels it her duty to ex-press her heartfelt gratitude to Dr. Czapkay, for the suc-cersful care of herself and child. The latter, having been afflicted by a severe attack of Cholera Infantum, was given up as incurable by the most celebrated phy-sicians, when she called on Dr. Czapkay, who after a short period restored the child to perfect health En-couraged by this extraordinary result, she sought advice herself, for the scrofulous malady with which she had been afflicted for eight years, and which with shood the treat ent of the best physicians in Europe and America. But Dr. Czapkay has succeeded in affording her perma-nent relief, se that she can now enjoy life, which, for eight years had lost all charms to her. She therefore deems it due to herself and to all sick and afflicted, to recommend Dr. Czapkay as one of the most skillful phy-sicians within the United States. MRS. CAROLINE GRAY, Cor.
