El Dorado County.

As the county seat question in El Dorado is one of a purely local character, we concluded to avoid April 25th : being mixed up in the controversy. Acting upon this conclusion, we have declined to publish com-munications on either side, but on the 1st inst. a letter from Granite Hill, which was rather severe on Coloma, found its way inadvertently into this near the section of the Indians. I am now on Indian Creek, about eighty-five miles from Cres-on Coloma, found its way inadvertently into this a party of prospectors puppering fitz men. We paper. In reply to this, we have received seve-ral communications, from which we have taken those we publish and here promose to let the those we publish, and here propose to let the were attacked by a party of Indians, numbering question rest. One of the letters is in reply to a about thirty. They fired on us while we were statement by our correspondent, "Quill-Driver," prospecting a small Gulch or Creek, and killed in reference to the water furnished by the "Gold Hill Ditch" Company. We know nothing of the followed them on to Indian Creek, where they merits of the question :

We acknowledge the jail now in use to be a very poor one, but the new granite jail, within ten days of completion, will be the most substantial and secure jail in the State. It is being constracted of as good gran-ite and iron as can be found in this or any other State. Again Mr. (Duil) Driver? niches the truth

State. Again, Mr. "Quill Driver" pitches the truth over his left shoulder when he declares "Placer-ville to be the most central to the majority of the residents." He must be wofully ignorant of the geography of the county and of the location of the opulation, or else he states wilfully what he knows be incorrect. to be incorrect. Another very weighty reason why Placerville should be the county seat is the fact that cheaper modes of conveyance are to be found there. Per-sons can go from Placerville to Sacramento for two cellers while form Coloma it is give. This deuters

dollars, while from Coloma it is six. This stunner, of course, should settle the matter. We yield, bring over your cart. It is true that Placerville has the benefit of opposition stages at the present time, if any benefit accrues from such opposition. Many thinking ones question the benefit done the public by such opposition. Now then, Mr. "Quill Driver," we find your assertions calculated to deceive none but the unthinking and unwary, and allow me to gently insinuate that your desire for removal does

send forth. Fifteen days hence (if P. dont vote on the 18th) will settle the affair, and just so sure as the voters of this county go to the ballot box, just so certain will Coloma be elected county seat, and with that decision must depart the last ray of hope from Placerville.st Her mines are worked out; agricul-tural grounds she has none, unless her citizens va-cate the place (the deen rayine) to one humble incate the place (the deep ravine) to one humble in-dividual, who may, after clearing off the houses, possibly find ground enough to keep a pig and a cow. INDIAN OUTBREAK AND BATTLE IN TULARS COUNTY .- A telegraphic dispatch from Stockton yesterday morning, to the Spirit of the Age, mentions the arrival at that place of Dr. George, from Visalia, Tulare county, who brings information of an Indian outbreak in that quarter and battle with the whites, in which the latter were compelled to retire. On the 22d of April, the Indians made a de

scent on the settlements, and drove off about five hundred head of cattle to the mountains. They were immediately pursued by the settlers, and all the cattle recovered. The Sheriff of Tulare county, W. G. Poindexter, then called out Capt. De Masters' company of Mounted Riflemen, a force of about sixty men, who followed the savages, and having encountered them on the North Fork of the Tule river, about 25 miles from Packwood's settlement, an engagement took place. After fighting about two hours, Captain De Masters' force were compelled to retreat from the action, being entirely inadequate in numbers gently insinuate that your desire for removal does not arise from a wish to accommodate or benefit the citizens of the county, but simply from the fact that you may have no taxes to pay, and, consequently, cannot be injured. You may have nothing to lose, Allow me, in conclusion, to offer a little advice. Before you again address the public through the press, be sure to study well the subject about which you would write, and do not omit to have an occa-sional fact interspersed with the assertions you were in strong force; probably five hundred is a were in strong force; probably five hundred is low estimate, and they are collecting to the point where the fight took place in large numbers. The settlers in the valley have all deserted their homes. and have fled to Woodville and Visalia, the tw largest settlements, for safety. An express which arrived at the former place the evening before our informant left, states that Wilkes' Sur-

veying Corps had, with one exception, been mas-

sacred by the Indians in the Mohave country.

To the Honorable the Mayor and Common Council of Sarramento: GENTLEMEN-Allow me to call your attention to the leaky condition of the reservoir tanks, and the necessity of taking some immediate steps for the repair of the same. The caulking of the tanks has almost entirely given out. I have had several esti-mates made by ship carpenters, and they say that they cannot be put in perfect order and insured for less than \$400 or \$500 each. The cheapest and best plan, in my opinion, is to line them with zinc. It can be done considerably less than re-caulking them, and I think it would answer a much better purpose and last longer than caulking in redwood, They tell me that there is an acid in redwood that eats out the caulking in two years at the longest. They ten me that there is an acid in redwood that eats out the cauking in two years at the longest. This being the case, I conceive it much the best plan to line them with some kind of metal. The present leaking of the tanks amounts to almost one gallon per second, and costs the city every twenty-four hours between six and eight dollars. Respectfully. T. HANSEROW.

"Take any shape but that, and my firm nerves shall never tremble!" Most forms of disase can be endured with fortitude, but Fever and Ague roduces an effect so disheartening, that no philosophy can endure it with patience. Fortunately, however Nature, in the plenitude of her generosity, furnishes a remedy which requires only chemical skill to bring it to ight, and science has at last penetrated Nature's repository and learned the secret of this wondrous compound. The result of this investigation is offered to the ublic in the well known article RHODES' FEVER AND AGUE CURE. He says: "The Gold Hill Ditch affords our en-tire mining district water in abundance. No sec-tion of country can boast of better water privileges orbetter mines in general." That the Gold Hill Ditch furnishes plenty of water for all the mines in that vicinity I do not wish to deny, but I do assert that the owners of that ditch, or those who control it, are monopolists, and appear determined to get all they can for their water. Now for the proof. The water which they bring to Granite Hill is water that has been used in the vicinity of Placer-ville. That it has a chance to settle and purify it-self on the way, I admit; but let us look at the prices. For the first head they charge fifty cents an inch, and for the second twenty-five cents. They then collect up this water, take out the sand by the an inch, and for the second twenty-five cents. They then collect up this water, take out the sand by the use of reservoirs, and sell it as first class water, at the rate of fifty cents per inch, and then follow it up, collecting money for its use, until the *turbid* stream raises so high a blush upon the check of their agent that his pride compels him to desist from demanding pay, and the honest miner who is using it for the seventeenth time gets it free. Again, if B buys a claim of A and is owing a water bill, B cannot get any water until he pays the claim of A. Now, if this is not taking the ad-vantage I would like to know what to call it; and yet "Quill Driver" has dared to speak of the exor-bitant prices at Coloma. What is the fact? We

have six ditches conveying water from the river past our town, affording an abundant supply at thirty-seven and a half cents per inch, good clear water, and the bright faces of the miners in this vicinity is the best proof in the world that the mines are paying well.

are paying well. Now, the controlling interest in the Gold Hill Ditch is owned in Placerville, and it is owing to the pernicious disposition of those men that the miners of Granite Hill are now oppressed with so high rents. The owners would do well to pause and consider, for there is already a storm brewing, which when it breaks forth will green to their which, when it breaks forth, will reveal to their marvelous eyes a state of feeling they have little dreamed of, and which will put to flight their most sanguine hopes.

THE MARIPOSA DIFFICULTIES .- In the Mariposa Gazette, of Friday last, we have an account of the troubles between the miners and the Chinamen in that county. Notice was given the Chinese population to quit the mines within ten days of the time of a meeting held by the miners, and in case of default, they were to receive thirty-nine lashes and be forcibly ejected. The Gazette proceeds :

On Tuesday, the time allowed the Chinese to vamos, being something more than out, a party of miners assembled themselves together, and proceeded to eject (per programme) such of the Chinamen as had not left. Few had gone, and the self-constituted executives had work to do, and they went at it resolutely—so much so, that a complaint was made on the evening of Tuesday against them, by citizens entertaining different views of public policy than their own. For burning sundry and divers cabins belonging to the chow chows, and otherwise conducting themselves in an indiscreet and disorderly manner, writs were issued and placed in the hands of Sheriff Early, who, accompanied by Under-Sher-iff Moore, repaired to the scene of action, where they found a small tea-party, of the num some twenty-five, who resisted the Sheriffs in the performance of their duty, and who, being an inferior force, were obliged to return empty town. On the next morning, the Sheriff w with promptitude summoned a large posse, and with them returned in search of this defiant crowd. Four were found and brought into Mariposa; the others were said to be "non est comatibus."

On Tuesday evening and Wednesday morning, others of the accused came into town and gave themselves up, and were examined before Justice teen of the party to appear before the Court of Sessions, in June next, in the sum of \$300 each. to answer to the charge of arson, &c.

SUDDEN DEATH .- A man named Frederick Withers, died suddenly in Marysville on Saturday, of hemorrhage of the lungs.

A regular prize fight, with a ring, and seconds, and bottle-holders and stake-holders, and all the concomitants of a pugilistic set-to between two of our citizens, came off, according to arrange ment, somewhere in Nerada county, on Wednes day last. The parties were Jack Robinson and

Beebe-the stakes \$100 a side. Thirty-eight rounds were fought, occupying one hour and twenty minutes. Beebe drew the first blood, and had the best of the fight all the way through—

OREGON INDIAN WAR AT WASHINGTON .- The correspondent of the Alta says :

There seems to be a great difference of opinion as to the origin of the Indian difficulties in Ore gon and Washington Territories, and the Indian Bureau is now preparing a report on the subject, but too late for the steamer to-morrow. The Commissioner thinks he will be able to show that the Indians are not so much at fault as their white brethren—and that the Governors of those territories are right, and Gen. Wool wrong.

It has the like effect on OLD MEN OR YOUTH IN SIGKNESS. After taking it, a general glow of warmth is felt through the chest and body, a strength in the limbs, a mental clearness of ideas, memory, and an exhilaration of spirits; in a few days the patient finds that a univer-sal strength, mental and bodiy, has gradually assumed a part of him; that disease of every kind has left him; that his blood courses through his veins, thin, rich and purc, his liver, before torpid, is now active; his ideas clear and lucid; his hand and nerves firm; he feels capa-ble of any exercise. Thus I have seen many very low from exposure, from disease and debauchery. IT IS A CURE FOR INTEMPERANOE. The appetite for liquor is destroyed. One among the most beautiful properties possessed by it is that it re-moves all longing or taste for liquor. Many incbriates have found that after it has renewed and strengthened them, and quieted their nerves, it has caused aversion to spirits. I have seen it cure some of the most fright-ful cases where delirium tremens has actually occurred. The most delicate lady or old person can use it with impunity.
